

## Wind cone biruta – waterproof nylon fabric refill (fabric only)

Eurosul Wind Biruta (fabric refill) is made of high strength resin nylon, ideal for applications in helipads, airports, offshore platforms and industrial areas. Its 100% polyamide fabric is waterproof and anti-fungal, ensuring durability and performance even under adverse weather conditions. The seams are double and reinforced with nylon grillon line, and the attachment is in nickel or aluminum steel, providing greater assembly safety. The product is available in different measurements and colors, including reflective tracks for night visibility.

**COD EUROSUL:** 004084

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Features

**Material:** Nylon 240 (100% Polyamide) with double resin layer

**Fabric:** Waterproof, anti-fungal

**Seams:** Double stitched, reinforced with Grillon nylon thread

**Reinforcement:** At cone inlet and outlet

**Fixation:** Nickel-plated steel or aluminum eyelets

**Warranty:** 30 days against manufacturing defects

**Available colors:** Orange, Yellow, White, Red, Striped (red/white, orange/white), Orange with reflective strip, Yellow with reflective

**Sizes:** Standard or custom-made

### Technical Specifications

**Length:** 120 cm

**Inlet diameter:**

30 cm

**Outlet diameter:** 15 cm

### **Applications**

Helidecks and heliports

Airports and aerodromes

Chemical and petrochemical industries

Offshore platforms and open operational areas

### **Benefits**

high resistance: reinforced material and durable stitching

operational safety: ideal to indicate wind direction and intensity

versatility: available in custom sizes and various color patterns
