

Wireless Heat/Smoke Detector Test Kit 9.3m Range SOLO 823

The 823 Solo Test Kit is a professional set to verify the functionality of heat detectors and wireless smoke. Designed for use in industrial and sea environments, it allows safe and efficient testing tests installed in difficult places, with a range of up to 9.3 meters. The kit includes extensible rods, an aerosol dispenser, a heat detector tester, rechargeable batteries and a transport bag for greater convenience. Ideal for vessels and offshore installations, ensuring compliance with safety standards.

Specifications

Benefits:

Efficient Testing: Allows safe verification of detectors installed at height

Modular Design: Includes extendable poles reaching up to 9.3 meters

Versatility: Compatible with various heat and smoke detector models

Portable and Organized: Carry bag for easy storage and handling

Technical Specifications:

Access Pole: SOLO 100 (15ft)

Extensions: 3x SOLO 101 (4ft each)

Universal Detector Removal Tool: SOLO 200

Aerosol Dispenser: SOLO 330

Heat Detector Tester: SOLO 460

Carry Bag: SOLO 610

Battery Charger: SOLO 727

Batteries: 2x SOLO 770
