

## Wireless Smoke and Heat Detector Test Kit TESTFIRE TF1001

The Testfire TF1001 heat and smoke test kit is a complete and portable solution for functional testing tests in naval and offshore environments. Composed of a Testfire 1000 Wireless Testing Equipment, TS3 smoke capsule, 727 solo charger and two soil batteries 770, the kit ensures precision, practicality and safety in periodic inspections.

**COD EUROSUL:** 005437

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

**Material:** Engineering-grade plastics, metal alloys, and high-precision electronic components

**Fasteners:** Quick and secure coupling system

**Design:** Compact, wireless, modular, and rechargeable

### Applications:

**Functional testing of smoke and heat detectors** on vessels, offshore platforms, and industrial units

**Periodic inspections** of maritime and industrial fire detection systems

### Benefits:

**Readiness:** Quick, reliable testing without removing detectors

**Durability:** Built to withstand harsh environments typical of naval and offshore sectors

**Safety:** Meets international fire prevention and detection standards, enhancing operational safety

The **TESTFIRE TF1001** kit is an essential tool to ensure full operational efficiency of fire detection systems, meeting the most stringent standards in the maritime, offshore, and industrial sectors.

### Technical Specifications:

**Material:** Engineering plastics, metal alloys, and high-precision electronics

**Fasteners:** Quick coupling system
