

Wireless Smoke, Heat & CO Detector Test Kit TF2001-1-001 Testifire

The Testifire TF2001-1-001 kit is a complete, professional solution for testing smoke, heat, and carbon monoxide detectors. It uses multi-stimulus technology without pressurized aerosols, ensuring clean, precise, and controlled testing.

The Testifire 2000 head unit automatically performs the full test sequence, generating smoke on demand, delivering accurate electronic heat testing, and verifying CO through a dedicated capsule. The kit includes Solo 770 battery batons and the Solo 727 charger, providing long runtime and continuous field operation. Ideal for preventive maintenance, inspections, and fire detection system certification.

COD EUROSUL: 091269

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Type: multi-stimulus detector testing equipment

Application: smoke, heat, and CO testing

Technology: on-demand smoke generation and electronic heating

Power supply: Solo 770 rechargeable battery batons

Compatibility: certified smoke, heat, and CO detectors

Benefits:

Readiness: fast automated testing with on-demand generation

Efficiency: no pressurized aerosols and reduced contamination

Safety: clean technology that does not damage detectors

Autonomy: long-lasting battery operation

Versatility: one device performs three test types

Technical Specifications:

Model: Testifire 2001

Included capsules: TS3 (smoke), TC3 (CO)

Power: two Solo 770 battery batons

Charger: Solo 727 AC/DC charger

Application: smoke, heat, and CO detector testing
