

## Fita Refletiva SOLAS XT1800 – Aprovada Lloyd’s Register

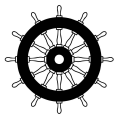

The SOLAS XT1800 Reflective Tape is an approved safety material for use on life jackets, lifebuoys, inflatable rafts, and other lifesaving equipment. Manufactured with microprism technology encapsulated in a silver film with high-performance adhesive, it provides outstanding night-time and low-light visibility. It complies with Directive 96/98/EC (MED) and IMO Resolution A.658(16) Annex 2, and is Lloyd’s Register certified, ensuring compliance with SOLAS standards.

**CÓD EUROSUL:** 000357

**IMPA:** 330189

**Part Number:** ---

**Aprovações:**

**SOLAS**

## Especificações

**Features:**

**Material:** Optical lenses encapsulated in silver retroreflective film

**Reflectivity:** High reflectivity under moisture and at multiple angles

**Adhesive:** Pressure-sensitive, excellent adhesion on smooth surfaces

**Certifications:** Lloyd’s Register – SOLAS/MED – IMO A.658(16)

**Applications:** Lifesaving equipment (lifejackets, lifebuoys, liferafts), maritime emergency and safety signage, naval and offshore use under SOLAS requirements, low visibility and nighttime operations.

**Benefits:**

**Guaranteed visibility:** Strong reflective power even in adverse conditions

**International compliance:** Certified for SOLAS/MED lifesaving equipment

**Easy application:** Pressure-sensitive adhesive for quick installation

**Technical Specifications:**

**Material:** Microprismatic encapsulated film with pressure-sensitive adhesive

**Color:** Silver

**Width:** 50 mm

**Length:** 45.70 m

**Certification:** Lloyd's Register – IMO A.658(16), SOLAS/MED

**Standards:** 96/98/EC Directive
