

## 24V Battery Charger for FSP127 Aldis

The C26665-01 battery charger is designed for 24V batteries used in the FSP127 Aldis signaling lantern. With dual voltage input (115/230V) and 24V DC output at 0.5A, it ensures efficient and safe charging. Certified MED 2012/32/EU and SOLAS, it meets the highest maritime standards.

<b>Part Number:</b>	C26665-01

**Approvals:**

## Specifications

### Features

**Input:** 115/230V AC

**Output:** 24V DC, 0.5A

**Certifications:** MED 2012/32/EU, SOLAS

**Compatibility:** 24V batteries for FSP127 Aldis lantern

**Design:** Portable, rugged and safe

### Applications

Charging of 24V batteries in FSP127 Aldis signal lanterns

Use in maritime and offshore operations

### Benefits

**Efficiency:** Keeps batteries ready for immediate use

**Durability:** Robust construction for severe maritime environments

**Safety:** Certified for compliance with international maritime standards
