## Specifications

### Overview

Sea anchor for liferaft and ship use, model RSHM-700, designed to help stabilize and position the craft in sea conditions. It is a marine safety item with SOLAS and CCS certification.

### Application and use

Suitable for liferafts and vessels that require a reliable drag device to reduce drift and improve control during operation.

### Construction characteristics

|          |             |
|----------|-------------|
| Material | Manila rope |
| Model    | RSHM-700    |
| Length   | 39 cm       |
| Width    | 39 cm       |

|        |       |
|--------|-------|
| Height | 21 cm |
|--------|-------|

### Technical specifications

|                        |       |
|------------------------|-------|
| Hawser length          | 27 m  |
| Hawser diameter        | 24 mm |
| Tripping line length   | 31 m  |
| Tripping line diameter | 16 mm |
| Maximum weight         | 18 kg |
| Supply quantity        | 300   |

### Compliance and certification

|       |                                   |
|-------|-----------------------------------|
| SOLAS | Cap. III Reg. 35; MSC.48(66)      |
| Class | CCS Certificate of Marine Product |

### Marking and traceability

|      |        |
|------|--------|
| SKU  | 000988 |
| IMPA | 330215 |

### Handling, service life and disposal

Store in a dry place away from direct sunlight to preserve the rope and textile components. Before use, inspect for wear, deformation, and overall integrity. Replace the item if any damage or loss of performance is found, following the disposal procedures applicable to textile materials.
