Specifications

Overview

CXU3-4 omnidirectional UHF antenna for marine and land communication. It is a compact solution designed to support stable signal coverage with simple installation and versatile use on board or onshore.

Application and use

Suitable for UHF communication systems on vessels, coastal facilities and land-based environments. Its omnidirectional pattern supports reception and transmission in multiple directions.

Construction characteristics

Antenna type	Omnidirectional
Model	CXU3-4
Application range	MARINE/LAND
Band	UHF

Technical specifications

SKU	004085
Frequency range	450.0-470.0 MHz

Handling, service life and disposal

Proper installation and secure mounting are recommended to preserve antenna performance and prevent mechanical damage. Store in a dry, protected place when not in use. Dispose of the product according to applicable environmental practices for electronic and metal components.
