Specifications

Characteristics

Material: UHMWPE rope with galvanized shackles

Load Capacity: SWL 6.5 tons (40 tons MBL)

Design: Compact, lightweight and resistant to maritime corrosion

Compliance: MSC.1/Circ.1327 | ABS Certification

Applications

Safe lowering and hoisting of lifeboats

Inspections and maintenance according to international standards

Mandatory equipment for SOLAS vessels

Benefits

High resistance: Excellent mechanical strength with reduced weight

Practicality: Quick and easy installation

Safety: Redundancy to the hook system ensures operational reliability

Technical Specifications

Material: UHMWPE

Capacity:

SWL 6.5 t / MBL 40 t

Dimensions: 1 meter length, 24 mm diameter

Standards: MSC.1/Circ.1327
