Specifications

Overview

Pneumatic dust vacuum cleaner for onboard cleaning and debris removal, with a 20 L tank. The TD-500/V-500 model is a compact option for deck cleaning and maintenance routines.

Application and use

Suitable for onboard cleaning in environments with compressed air available, helping remove dust and solid residues during routine operations.

Construction characteristics

Sub-item	PNEUMATIC
Model	TD-500/V-500
Capacity	20 L
Net weight	6.36 kg

Technical specifications

Length	59 cm

Width	32 cm
Height	33 cm
IMPA	590722

Marking and traceability

SKU	091679
IMPA	590722

For best performance, keep the unit clean and store it in a dry place after use. Periodically check hoses and suction components to maintain operating efficiency.
