

Extension Pole 1.13m Solo

The SOLO 101 fibreglass extension pole is designed to extend reach during detector testing and maintenance, making daily work safer and more practical. Lightweight, durable and easy to lock, it helps improve comfort and control with SOLO 100 and SOLO 108 equipment.

COD EUROSUL: 004387

IMPA: 331425

Part Number: SOLO101-001

Approvals: ---

Specifications

Overview

Fibreglass extension pole designed to extend reach for SOLO testing and maintenance equipment. It is a lightweight, practical solution for work at height or in hard-to-reach areas.

Application and use

Suitable for use with Solo 100 and Solo 108 testers, helping position the equipment with greater safety and accuracy. It can be used individually, with a maximum reach of 2.5 m.

Construction characteristics

Material	fibreglass
Has simple locking mechanism	Yes
Length (m)	1.13
Net weight ERP	0.52 kg

Technical specifications

Model	SOLO 101
Compatibility	Solo 100 and Solo 108

Part number	SOLO101-001
IMPA	331425

Handling, service life and disposal

Keep clean and store in a dry place, avoiding impacts and excessive force on the locking mechanism. As a non-electronic component, service life depends on use and care; at end of life, dispose of it according to local practices for composite and reinforced plastic materials.
