Specifications

Overview

Telescopic extension pole in fiberglass, designed for use with SOLO 100 testers. Its 4-section construction allows the reach to be adjusted according to the needs of the operation.

Application and use

Suitable for testing and inspections at height, providing greater reach for the operator without compromising handling convenience. It is a support accessory for SOLO 100 verification routines.

Construction characteristics

Material	Fiberglass
Configuration	4 telescopic sections

Technical specifications

Total length	4.5 m
Compatibility	SOLO 100
Net weight	1.76 kg

Marking and traceability

SKU	004072
IMPA	331424

For best preservation, keep the pole clean and stored in a dry place after use. Avoid impacts and excessive force on the telescopic sections to maintain performance and service life.
