Specifications

Overview

Emergency chemical light stick for visual signaling in low-visibility situations and rapid response on board. Its compact format makes it easy to carry and deploy whenever simple, effective visual communication is needed.

Application and use

Suitable for survival kits, rescue gear, and emergency support at sea. It can be used as a portable signal device in safety procedures, with long operating time and good visibility.

Construction characteristics

Product type	Emergency chemical light stick
Color	Green
Has hook	Yes
Waterproof	Yes
Non-toxic	Yes

Technical specifications

Length (cm)	15
Diameter (cm)	2
Weight (g)	20
Operating time (hours)	12
Minimum operating temperature (°C)	-30
Maximum operating temperature (°C)	50

Compliance and certification

EN/ISO/IEC	ABNT NBR 14725:2023

Marking and traceability

SKU	093037
IMPA	330602

Handling, service life and disposal

Store in a dry place, away from excessive heat and direct sunlight. Observe the 4-year shelf life and dispose of the item according to local guidance for emergency chemical products.
