

ICOM BP-252 Rechargeable Battery for IC-GM1600 GMDSS Radio

The ICOM BP-252 rechargeable battery is a lithium-ion battery designed for the IC-GM1600 GMDSS radio, delivering reliable performance and long service life for maritime applications. With 7.4V and 980 mAh capacity, it provides stable and efficient power, making it suitable for emergency and continuous operation onboard vessels. The Li-Ion technology ensures improved performance without memory effect. The BP-252 replaces the discontinued Ni-Cd batteries BP-224 and BP-225 and is also compatible as a replacement for the BP-241.

COD EUROSUL: 098323

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Applications: Commercial and offshore vessels

Technical Specifications:

Model: BP-252

Type: Rechargeable Li-Ion battery

Voltage: 7.4V Capacity: 980 mAh

Compatibility: ICOM IC-GM1600, M36, M34

Replacement: BP-224, BP-225, BP-241
