Specifications

Overview

Sealed rechargeable lithium-ion battery for the SAILOR SP3965 portable marine radio. It is intended as a replacement part to keep the equipment operational with practical, everyday use.

Application and use

Used with compatible SP3965 radios, especially in onboard communication routines and operations that require mobility. Its sealed format supports easier handling and quick battery replacement.

Construction characteristics

Battery format	SEALED
Casing material	RIGID PLASTIC
Li ion	LITHIUM-ION

Technical specifications

Model	SP3965
Radio model compatibility	SP3965
Part number	S-403906A
Sub-item	RECHARGEABLE
Weight (kg)	0.18

Compliance and certification

ATEX/IECEx	Applicable to the stated assembly

Marking and traceability

SKU	005338
Part number	S-403906A

For best performance and service life, store the battery in a dry place, away from excessive heat and impacts. Replace it when autonomy drops or signs of wear appear, and dispose of it according to local lithium-ion battery regulations.
