

Battery Kit for EPIRB Tron 60S/60GPS

Lithium EPIRB battery for Tron 60S/60GPS marine beacons, ensuring reliable emergency signaling. Tested under the UN Manual of Tests and Criteria ST/SG/AC.10/11, Chapter 38.3.

COD EUROSUL: 004320

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: Lithium battery with metallic and plastic components

Design: Sealed for safety in adverse maritime environments

Certifications: Complies with NS-EN ISO 9001/14001 and UN Testing Manual standards

Weight: 145 g

Lithium content: 7.84 g

Applications

Used in EPIRBs to indicate emergency position of vessels

Benefits

Readiness: Immediate activation in critical situations

Durability: Long service life even under extreme conditions

Safety: Designed to prevent leaks or explosions

Technical Specifications

Material: Lithium and metal alloy

Weight: 145 g

Transport Regulations: Class 9, UN3090
