Specifications

Overview

Whale MK5 manual bilge pump, model BP0510, single acting, intended for manual onboard dewatering.

Application and use

Used on vessels to remove water from bilges and internal areas, especially where no electrical power is available or as a backup solution.

Construction characteristics

Body material	glass-filled polypropylene
Sub-item	MANUAL
Part number	BP0510

Technical specifications

Model	MK5
Flow Rate (GPM)	17.5

Hose connection (mm)	38
Weight (kg)	1.36

Compliance and certification

EN/ISO/IEC	EU Declaration of Conformity
Certificate	CE

Marking and traceability

SKU	000947
Part number	BP0510
IMPA	330280

For best performance and service life, keep the pump clean, periodically inspect the diaphragm, valves and seals, and store it in a dry place when not in use.
