

## Bright Star Raptor Spot Rechargeable Lantern with AC/DC Chargers

The Bright Star Raptor Spot rechargeable lantern is designed for professional use in industrial, marine, offshore, and hazardous environments. Compact, rugged, and high-performance, it delivers a powerful long-range focused beam for emergency response, inspections, and safety operations. Certified for hazardous atmospheres and built with IPX7 waterproof protection, the Raptor Spot ensures reliable performance in demanding conditions. Featuring adjustable light modes, extended runtime, and floating capability, it is ideal for critical and continuous-duty applications. Both models include 120V AC and 12/24V DC chargers, allowing convenient charging in fixed installations and operational vehicles. Available in Hi-Vis green and red versions.
