SOLAS

Specifications

Overview

Class B magnetic compass for lifeboats and rescue boats, in a bracket mount version. The B-81-WM model belongs to the Ritchie Navigation family and is designed to provide reliable heading reference in regulated marine applications.

Application and use

Suitable for installation on lifeboats and rescue boats, with 12V electrical supply. It is a practical solution for heading reference during emergency operations and onboard navigation.

Construction characteristics

Type	magnetic compass
Class	Class B
Mounting	bracket mount
Brand	RITCHIE

Technical specifications

Model	B-81-WM
Part number	B-81-WM
Working voltage	12V
IMPA	330211
Weight	0.72 kg

Compliance and certification

SOLAS	Reg. III/4; Reg. III/34; Reg. X/3; MSC.48(66)
MED	MED/4.23; Module B
EN/ISO/IEC	ISO 1069; ISO 25862; IEC 60945
EC Type Examination	TUV

Marking and traceability

SKU	090281
Part number	B-81-WM
IMPA	330211

Handling, service life and disposal

Keep the compass installed and stored away from strong magnetic fields and impacts that could affect accuracy. Periodic inspection of the mounting and operation is recommended in marine service. At end of life, dispose of it according to local environmental practices and applicable regulations for navigation equipment.
