Specifications

Overview

Protective hood for firefighting, designed to cover the head and neck with comfort and a proper fit. The HJ660 by HERCULES is intended for use with proximity and firefighting garments, providing a lightweight and practical solution for heat and flame exposure.

Application and use

Used by fire brigades and firefighters during firefighting operations and thermal exposure tasks. The ninja opening helps integrate with other PPE while keeping the facial area protected without limiting mobility.

Construction characteristics

Material	Meta-aramid
Construction	Flame-retardant mesh, 1 layer
Color	Beige
Model	HJ660
Part number	HJ66000MD

Technical specifications

Size	M
Length	42 cm
Width	22 cm
Fabric weight	300 g/m ²
Net weight	0.18 kg

Compliance and certification

EN 13911:2017	Certification reference provided for the model
MTE CA	15,307

Marking and traceability

SKU	000864
Part number	HJ66000MD
Model	HJ660

For best preservation, keep the hood clean, dry, and stored away from heat sources and aggressive agents. Replace the item if there is visible wear, loss of integrity, or after severe use according to the PPE policy of the operation.
