

Cartridge for Linethrower 250 – PWSS/COMET

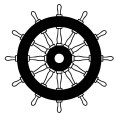

The PWSS/COMET Rocket Cartridge is a pyrotechnic replacement unit designed for exclusive use with the Linethrower 250 launcher. Certified under SOLAS and IMO MSC.81(70) standards, it is engineered to project a 4 mm line up to 250 meters in emergency maritime operations.

COD EUROSUL: 000832

IMPA: ---

Part Number: 9500800 / 9162700

Approvals:

SOLAS

Specifications

Technical Features

Line range: Up to 250 meters

Line: 4 mm diameter

Use: Single shot

Composition: Potassium nitrate, pyroxylin, nitroglycerin

UN classification: UN0431 – Class 1.4G

Certifications: SOLAS, IMO MSC.81(70), MED, USCG Approval No. 160.040/12/0 (valid until 25/10/2027)

Storage: Compatible with Class 1, Division 1.4G storage facilities

Hazards: Fire and projection hazard, explosive

Applications

Ship-to-ship connection at sea

Line launching to shore in rescue operations

Maritime operations requiring line-throwing equipment under international standards

Benefits

long range and high reliability

internationally recognized certifications

safe and effective system for maritime emergency situations
