Specifications

Overview

Spare cylinder for SCBA breathing apparatus, made of steel and supplied with breathable compressed air. It is intended for replacement in open-circuit self-contained breathing equipment, helping keep the set operational.

Application and use

Used with the RHZK SCBA, this cylinder serves as a spare part for quick changeover during operation, inspection, or maintenance. Its 6 L capacity and 300 bar working pressure support the breathing system's autonomy.

Construction characteristics

Material	steel
Sub-item	spare
Part type	cylinder
Supplied with gas	Yes

Technical specifications

Cylinder capacity (L)	6
Working pressure (bar)	300
Application	for RHZK SCBA
Model	RHZK

Performance

Content	100% breathable compressed air
Classification	pressurized gas, non-flammable
UN	UN1002
Hazard class	2.2

Marking and traceability

SKU	003961
