

DAN W4-A JUDGMENT COLLECT LIGHT-ALLALIAL BATTERY

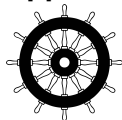

Dan W4-A life jacket light is a robust and reliable solution for emergency visual signs developed with integrated alkaline battery. Ideal for all types of life jackets, this intermittent light offers automatic activation to contact with water, as well as manual drive option. Fully compatible with sole international standards, it meets the intensity and duration of operation requirements in critical sea situations.

COD EUROSUL: 090130

IMPA: 330143

Part Number: PN1360

Approvals:

Specifications

Features

Material: Compact and sealed structure with durable plastic body

Fixers: Supplied with fixing clip for secure installation on life jackets

Design: Compact, low-profile, easy activation

Light source: White LED, flashing

Minimum intensity: ≥ 0.75 candela

Duration: ≥ 8 hours

Battery: Alkaline (non-rechargeable)

Activation: Automatic upon water contact or manual via push button

Service life: 5 years (expiration date marked on housing)

Certifications: SOLAS, IMO MSC.81(70), Transport Canada, Lloyd's Register

Applications

Essential equipment for life jackets on commercial vessels
Offshore platforms
Passenger ships
Ensures reliable visual location in emergency situations

Benefits

Readiness: Automatic water activation ensures immediate response
Durability: Sealed alkaline battery with long shelf life and environmental resistance
Safety: High night-time visibility, fully compliant with international standards

Technical Specifications

Material: High-strength sealed polymer
Fixers: Clip included for quick attachment
Battery: Sealed alkaline (non-replaceable)
Luminous intensity: ≥ 0.75 cd
Autonomy: ≥ 8 hours
Service life: 5 years
Certifications: SOLAS, Transport Canada (LR2003144TC)
Activation: Manual and automatic
