

EEBD Ocenco M20.2T: Emergency Training Equipment

The EEBD Ocenco M20.2T is a self-contained breathing apparatus specifically designed for training in emergency escape procedures. This Ocenco M-20.2T Trainer (P/N 940011) strictly adheres to SOLAS international safety standards, providing a realistic and safe experience for users during training sessions. With 15 minutes of simulated respiratory protection, this equipment enables trainees to develop practical skills in a controlled environment, preparing them to face real emergency situations with confidence.

COD EUROSUL: 000454

IMPA: 330438

Part Number: 940011

Approvals: ---

Specifications

Features:

Model: Ocenco M-20.2T Trainer – P/N 940011

Purpose: designed for EEBD emergency escape training

Realistic simulation: replicates operational use without oxygen activation

Compliance: fully aligned with SOLAS standards for safe instruction

Design: compact and ergonomic, identical to the live model

Benefits:

Preparedness: builds practical skills for high-pressure situations

Safety: enables realistic training with zero risk to the user

Confidence: ensures trainees are ready for real emergency conditions

Technical Specifications:

Material: high-quality, durable components

Simulated duration: up to 15 minutes

Dimensions: 21 × 23 × 10 cm

Weight: 1.0 kg

Certification: SOLAS compliant
