

Emergency Battery for McMurdo R5 GMDSS Radio

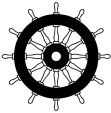

The McMurdo TT-1708A emergency battery is an essential component for the McMurdo R5 GMDSS VHF radio (20-001-01A), ensuring reliable power in critical situations. Designed with lithium iron disulfide technology, this non-rechargeable battery is intended exclusively for maritime emergencies. Its robust construction, featuring six hermetically sealed cells, provides maximum protection against physical and electrical short circuits, while offering high resistance to harsh marine environments.

COD EUROSUL: 005462

IMPA: ---

Part Number: 20-003-01A / TT-1708A

Approvals:

SOLAS

Specifications

McMurdo TT-1708A Battery – Reliable Power for Maritime Emergencies

Technical Features

Material: Iron disulfide and lithium with reinforced plastic casing

Type: Non-rechargeable primary battery

Protection: Hermetic sealing with advanced short-circuit prevention

Compatibility: Exclusive for McMurdo R5 GMDSS VHF radios

Key Applications

Emergency power for GMDSS systems in commercial vessels and offshore rigs

Ensures critical communication in life-threatening maritime situations

Advantages

Instant power: Ready for immediate use in emergencies

Durability: Designed to withstand moisture, vibration, and extreme temperatures

Safety: Leak-proof and electrical failure protection

Compliance

Meets international maritime safety standards for emergency equipment

Technical Specs

Composition: Iron disulfide and lithium

Rechargeable: No

Specific use: McMurdo R5 GMDSS VHF radio
