

## Fiberglass Box for Life Jackets Model FN.BC-115

The Fiberglass Box for Life Jackets Model FN.BC-115 is designed for the safe and organized storage of life jackets and immersion suits in marine and offshore environments. Manufactured in high-resistance fiberglass, it provides excellent durability, corrosion resistance, and weather protection. The external surface is finished with orange UV-protected gel coat, ensuring high resistance against sun exposure and excellent visibility in operational areas. The top lid includes stainless steel AISI 304 hardware, such as hinges, pressure latches, and handle, providing enhanced durability and long service life even in harsh environments. Ideal for vessels, offshore platforms, ports, industrial areas, and general marine applications.
