

Firefighter boot Harvik Jobeluv Fire Boot

The Harvik Jobeluv Fire Boot is a certified personal protective equipment designed for firefighting in industrial, marine, and emergency environments. Made from vulcanized rubber with an internal fabric lining, it offers resistance to high temperatures, chemical liquids, and impacts. Featuring a steel toe cap, metallic insole, shin guard, and carrying handle, it provides safety and practicality for firefighting professionals. Black color with yellow details for improved visibility in the field.
