Gangway Safety Net

The Gangway Safety Net is made from polypropylene (PP) and designed to protect crew members, passengers, and visitors from falls during boarding and disembarking on gangway ladders. Its use is mandatory under the Code of Safe Working Practices for Merchant Seafarers (2006), complying with SOLAS 1974 and Brazilian DPC regulations. Available in multiple dimensions to fit any gangway ladder, the net combines resistance to marine conditions, simple installation, and compliance with major international maritime safety requirements.
