

Hammar HM-0406 MKI ERU hydrostatic release unit electric/water remote

The Hammar HM-0406 MKI ERU hydrostatic release unit is a remote electric and water-activated component designed for lifebuoy systems on commercial and offshore vessels. Built to ensure automatic and reliable release of life-saving equipment in emergency situations, it meets the most stringent international maritime safety standards. Compatible with the MKI ERU replacement kit, it has a service life of 2 years from the date of installation and marking, as specified by the manufacturer. Essential for maintaining compliance and operational readiness of onboard lifebuoy systems.
