

Hammar HM-0409 hydrostatic release unit electric/water remote for EPIRB

The Hammar HM-0409 hydrostatic release unit is an electric and water-activated remote unit (ERU), developed specifically for EPIRB systems on commercial, naval, and offshore vessels. Available in red and yellow, it ensures automatic and reliable EPIRB release in emergency situations, meeting the most stringent international maritime safety standards.

With a service life of 2 years from the date of installation and marking, as specified by manufacturer Hammar, it is an essential component for maintaining compliance and operational readiness of onboard life-saving systems.

COD EUROSUL: 005274
