

## HAMMAR MKII Hydrostatic Valve Maintenance Kit HM-0630

The HAMMAR HM-0630 Maintenance Kit is designed for replacement and maintenance of HAMMAR MKII hydrostatic systems used in liferafts and marine safety equipment.

Manufactured with high-reliability components, it ensures efficient activation of the hydrostatic release system in emergency situations. Compatible with lifebuoy systems and ERU Elect/Water hydrostatic units, the kit provides operational safety, compliance with marine standards, and excellent performance in marine and offshore applications. Ideal for commercial vessels, offshore platforms, ships, and marine operations requiring certified and reliable life-saving equipment.
