Specifications

Overview

Brass ship’s clock identified commercially as 150/6111FS, intended for bridge instruments and onboard replacement. The unit features a time zone sector configuration and a finish designed to blend into the navigation environment.

Application and use

Suitable for vessels using classic-style bridge clocks and instruments, whether for original installation or component replacement. It also supports maintenance projects that require a compact part that integrates easily with the existing set.

Construction characteristics

Material	Brass
Sub-item	SETOR FUSO

Technical specifications

Part number	150/6111FS
Weight (kg)	0.63

Marking and traceability

SKU	090145
Part number	150/6111FS
IMPA	370201

Handling, service life and disposal

Keep clean and protected from impacts and excessive moisture to preserve the finish. In normal onboard use, service life depends on installation and maintenance conditions. Dispose of the metal component according to applicable environmental and recycling procedures.
