

ICOM BC-173 Battery Charger for IC-GM1600 Radio

The ICOM BC-173 battery charger is designed for efficient charging of batteries used in the IC-GM1600 GMDSS radio. Compact and reliable, it is suitable for marine applications and emergency communication operations. Supplied with a power adapter, the BC-173 operates with 13.8V DC input, providing stable and secure charging for professional maritime communication systems.

COD EUROSUL: 005521

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Applications:

Marine GMDSS radios
Commercial and offshore vessels
Emergency communication systems

Technical Specifications:

Model: BC-173

Type: Battery charger

Compatibility: ICOM IC-GM1600 radio

Input voltage: 13.8V DC

Charging current: 100 mA

Charging temperature range: 0 °C to +45 °C

Included: Power adapter
