

Inflatable vest kadematic 150n SOLAS with lamp

The Inflatable Kadematic Solo 150N vest is a security equipment certified for industrial applications, offshore professionals and high seaship navigation. Developed according to the new 2010 solas regulations, it offers reliable protection and high performance in fluctuation. This vest has two independent air chambers, ensuring additional redundancy and safety. Each chamber provides approximately 160n of floatability, exceeding the minimum requirement of 150N to ensure the user's safe position in the water.

COD EUROSUL: 000587

IMPA: 330140

Specifications

Features

Buoyancy: $\geq 150N$ (160N per chamber)

Inflation System: Automatic and manual

Air Chambers: Dual chambers for enhanced safety

Material: Robust and tear-resistant construction

Reflective Tape: SOLAS 3M, ensuring high visibility

Certifications

SOLAS 2010 (Safety of Life at Sea)

IMO MSC.81(70) and MSC.200(80)

MED (Marine Equipment Directive)

Applications

Offshore operations, providing essential safety for maritime workers

Commercial vessels, compliant with mandatory international standards

Maritime rescues, delivering reliable performance in emergency situations

Benefits

Quick and efficient inflation with automatic or manual activation

High visibility with SOLAS 3M reflective tapes for easy detection

Durable and resistant, designed for extended use in extreme environments
