

Sand Content Kit 209657 FANN

The FANN Sand Content Kit is a practical solution for measuring sand content in drilling fluids quickly and reliably. Ideal for field use, it brings together the items needed for an organized sieve analysis, helping maintain operational control.

COD EUROSUL: 003015

IMPA: ---

Part Number: 209657

Approvals: ---

Specifications

Overview

Kit for determining sand content in drilling fluids by sieve analysis. It includes a special 200 mesh sieve, measuring tube, wash bottle and carrying case, providing a ready-to-use set for field and laboratory routines.

Application and use

Designed for drilling fluid control, helping verify sand content during operation. The set supports sample collection, washing and reading, with a measurement range from 0 to 20%.

Construction characteristics

Screen material	brass
Collar and funnel material	polyethylene
Includes carrying case	yes

Technical specifications

Sieve mesh	200 mesh
Sieve diameter	2 1/2"

Measuring tube volume	10 mL
Wash bottle volume	500 mL
Measurement range	0 to 20%

Marking and traceability

SKU	003015
Part number	209657

Handling, service life and disposal

Keep the kit clean and dry after use, protecting the sieve and measuring tube from impact. Store it in the carrying case to preserve the components and avoid sample contamination. Disposal should follow the applicable practices for each component material and the user's environmental procedures.
