Specifications

Overview

Complete smoke detector test kit designed to support functional checks of detectors at different heights and positions. The set combines the dispenser, telescopic extension pole and test cans in a practical solution for maintenance and inspection work.

Application and use

Suitable for smoke detector testing in elevated access areas, allowing reach up to 3.7m with the configured set. It is well suited to preventive inspection routines and operational checks in marine and industrial environments.

Construction characteristics

Sub-item	COMPLETE
