Specifications

Overview

Complete smoke detector test kit designed to support inspections and preventive maintenance with greater reach and better organization. It brings together the items needed for practical operation in hard-to-access points.

Application and use

Suitable for functional testing of smoke detectors in elevated areas, corridors, technical rooms and other locations where direct access to the device is limited. The set helps streamline maintenance routines with improved safety and efficiency.

Technical specifications

Model	SOLO809
Supply format	kit
Sub-item	COMPLETE
Length	4.5 m
Maximum reach	6 m

Net weight	15.0 kg

Marking and traceability

Part number	330/100/M8/604
Manufacturer part number	330/100/M8/604
IMPA	331073

Handling, service life and disposal

Store the components in a dry, protected place after use, keeping the bag and accessories organized to preserve the set. Follow the manufacturer’s instructions for aerosol handling and consumable replacement, and dispose of packaging and used items according to applicable environmental practices.
