RINA

Specifications

Overview

Automatic lifejacket light, model LNK-SL3, with flashing white LED and included fixing clip. It is designed to improve wearer visibility in emergency situations at sea.

Application and use

Compatible with all types of lifejackets, with automatic water-sensor activation and manual shutoff. It is a practical solution for vessels, liferafts, and safety kits that require reliable emergency lighting.

Construction characteristics

Material	Polycarbonate
Light source	White LED
Sub-item	With clip
Fixing clip included	Yes

Activation type	Automatic and manual

Technical specifications

Model	LNK-SL3
Part number	LNK-SL3
Battery	2 AAA alkaline batteries
Luminous intensity (cd)	1.2
Light autonomy (h)	26
Flash frequency per min	50-70
Dimensions	62.5 x 25.4 x 23.5 mm
Weight	38 g
Operating temperature (°C)	-1 to +30
Storage temperature (°C)	-30 to +65
General service life years	5

Performance

Activation	Automatic by water sensor
Manual shutoff	Yes
Compatibility	All types of lifejackets

Compliance and certification

SOLAS	Reg. III/7, III/22, III/26, III/32, III/34; MSC.48(66); MSC.81(70)
MED	MED/1.2c; Module B; Module D
USCG	161.112
EN/ISO/IEC	IEC 60945; ISO 24408

Marking and traceability

SKU	003551
IMPA	330143
Part number	LNK-SL3

Handling, service life and disposal

Store in a dry place within the stated temperature range and check operation periodically before boarding. The stated general service life is 5 years, and batteries should be replaced as needed for operational readiness. Dispose of the unit and batteries in accordance with applicable environmental and waste procedures.
