Specifications

Overview

Long D shackle for lashing and fastening in marine and offshore applications. Made of SUS316 stainless steel, it offers strong corrosion resistance for use in harsh environments.

Application and use

Suitable for connections, lashing and onboard fastening points, especially where there is constant exposure to moisture and salt. It can also be used in offshore operations that require a compact and durable accessory.

Construction characteristics

Material	Stainless steel SUS316
Sub-item	Long D

Technical specifications

Diameter	8 mm
Approx. net weight	0.08 kg
Approx. registered dimensions	8 x 5 x 1 cm

Handling, service life and disposal

Store in a dry, clean place to preserve the finish and corrosion resistance. Before use, check for wear, deformation and pin condition. Replace the item if any damage is found and dispose of it according to applicable metal scrap procedures.
