Manual Release Hook for Inflatable Liferaft T-ISS PX02 SWL 25kN SOLAS/MED

The T-ISS PX02 Release Hook is an automatic/manual release mechanism designed for davit-launched inflatable liferafts, with a safe working load (SWL) of 25 kN (2,500 kg). Built from stainless steel 316 and Duplex, the PX02 can operate as an automatic release hook, activating when the raft enters the water, or as a manual release hook, providing maximum operational flexibility in emergencies.

Certified under MED Directive 96/98/EC, Bureau Veritas, Korean Register, and RINA, the PX02 fully complies with SOLAS requirements (MSC.320(89) and MSC.321(80)) and the LSA Code (MSC.81(70)). Eurosul is the official distributor and authorized service station for T-ISS hooks in Brazil. The hook requires inspection and parts replacement every 5 years, contact us for this service.

Specifications

Model: T-ISS PX02

Part Number: RELHK-PX02

SWL (Safe Working Load): 25 kN (2,500 kg)

Activation Type: Manual / Automatic (off-load)

Application: Davit-launched inflatable liferafts (single fall)

Material: Stainless steel 316 / Duplex

Dimensions: 300 x 190 x 70 mm

Weight: Approx. 8.2 kg

Recommended wire rope: Non-rotating

Shackle: Ø19 mm to Ø27 mm

Maintenance interval: Inspection and parts replacement every 5 years

Country of origin: China

HS Code: 73269092

Certifications: MED 96/98/EC · Bureau Veritas · Korean Register MED-MB-1283-21 / 1.26a&b · RINA MED 000816ws/002 · RINA MED014820WS

Applicable standards: SOLAS MSC.320(89) and MSC.321(80) · LSA Code MSC.81(70) · MED 2014/90/EU · Reg. (EU) 2019/1397
