Specifications

Overview

Marine 7×50 binoculars for onboard use, designed for observation with stable image performance and strong light capture. The gold finish and the absence of an integrated compass give the product a simple, functional profile.

Application and use

Suitable for navigation, watchkeeping, and observing targets or visual references on deck and in external areas of the vessel. It also supports operational routines that require quick and comfortable visual reading.

Handling, service life and disposal

Keep clean and dry after use, avoiding impacts and unnecessary exposure to moisture and salt. To extend service life, clean the lenses with a soft cloth and store the binoculars in a protected place when not in operation.
