

Marine Radar Reflector TLF-470A

The TLF-470A marine radar reflector is designed to enhance vessel visibility on radar systems, improving navigation safety. Suitable for small and medium-sized vessels, it significantly increases radar detection, especially in low visibility conditions. Constructed with a lightweight and durable folding design, the TLF-470A is easy to transport and install. It is CCS certified in accordance with IMO MSC.164(78) standards, ensuring compliance with international performance requirements for radar reflectors.

COD EUROSUL: 091096

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Applications:

Commercial and recreational vessels
Marine safety equipment
Coastal and offshore navigation

Technical Specifications:

Model: TLF-470A

Type: Marine radar reflector

Structure: Folding

Certification: CCS compliant with IMO MSC.164(78)

Application: Radar visibility enhancement
