

PTT Speaker Microphone IP67 Entel UK

The Entel UK CMP950 PTT speaker microphone is designed for reliable communication in demanding environments where water exposure is a concern. Submersible and IP67 rated, it supports compatible HT800 and HT900 series radios with the durability expected for professional use on board or in the field.

Specifications

Overview

The CMP950 is a submersible remote PTT speaker microphone from the CMP series, intended for compatible Entel radios. It is a practical solution for clear, immediate communication, with a design suited to professional use in wet or water-exposed conditions.

Application and use

Used with HT800 and HT900 radios, including the compatibility indicated for HT883 IIA, the CMP950 is suitable for onboard operations, technical areas and tasks where the operator needs the radio protected and communication close at hand.
