Specifications

Overview

Savox C-C440 microphone with PTT control unit for Motorola radios, designed for demanding operations and hazardous areas. The unit is built to support fast radio communication with comfortable everyday handling.

Application and use

Used for operational communication with Motorola DGP8050EX and DP4401EX radios, especially in industrial and classified areas. The extra-large PTT button and 360° swivel clip improve handling with gloves and secure attachment to clothing or equipment.
