Specifications

Overview

Push-to-talk module for JOTRON headsets, identified by part number 19601, intended for use with the Tron TR30 system. The ERP description also indicates Type D and V04 connector configuration, plus a 4-pole Nexus interface for headset integration.

Application and use

Used in onboard communications, especially at operator stations where quick audio activation and reliable headset integration are required. Suitable for replacement, maintenance, or standardization of the onboard communication set.

Construction characteristics

Accessory type	Push-to-talk module for headset
Sub-item	TYPE D
Model	V04
Headset connector	4-pole Nexus connector

Technical specifications

Compatibility	Tron TR30
Part number	19601
Type d	Yes

Marking and traceability

SKU	005257
Part number	19601

Handling, service life and disposal

Handle the accessory carefully during installation and replacement, avoiding excessive stress on the connector and headset cable. Store in a dry, protected place when not in use. At end of life, dispose of it according to applicable environmental procedures for electronic equipment and components.
