Specifications

Overview

Tank detection paste designed to indicate the presence of oil, fuel and water during gauging with a measuring stick. The compact tube format makes manual handling easy and supports quick routine inspections.

Application and use

Applied directly to the measuring stick, the paste changes color on contact with the detected product, helping identify level and the presence of contaminants or water in the tank. It is suitable for onboard checks and industrial environments that require practical readings.

Construction characteristics

Appearance	Brown solid paste
Packaging	Compact tube for manual use
Volatility	None
Flammability	Non-flammable at ambient temperature

Technical specifications

Mass	75 g
Boiling point	100 °C
Water solubility	Yes
Color change	Pink on contact with oil or water

Marking and traceability

SKU	000362
IMPA	650891

Handling, service life and disposal

Keep the package closed when not in use and store in a dry place away from excessive heat. As a manual-use, non-flammable product at ambient temperature, disposal should follow local practices for maintenance waste and packaging.
