Specifications

Overview

Hand sounding lead for manual depth measurement, intended for marine use and navigation support. The lead body and 6 mm x 20 m line provide simple operation and good resistance to wear from water and air exposure.

Application and use

Used on board for manual sounding during depth checks, especially in maneuvers, approaches, and operations where direct reading is required. The yellow line improves visibility during handling.

Construction characteristics

Material	Lead (Pb)
Line	Yellow

Technical specifications

Weight	3.2 kg
Cable diameter	6 mm
Cable length	20 m

IMPA

370301

Handling, service life and disposal

After use, rinse and dry the assembly to reduce salt and moisture buildup. Store in a dry place, away from impacts and line deformation. Because it contains lead, disposal must follow applicable environmental and waste regulations.
