Specifications

Overview

Multifilament polypropylene cargo net for lifting and securing loads, with 3-strand construction and reinforced mesh. It is suited for onboard handling operations that require practicality and balanced load distribution.

Application and use

Used on deck to move, contain and stabilize cargo during shipboard operations. The 2.5 x 2.5 m size suits applications where strength, light weight and easy handling are important.

Construction characteristics

Material	Multifilament polypropylene
Construction	3-strand
Outer rope	16 mm
Inner rope	20 mm

Technical specifications

Length	2.5 m
--------	-------

Width	2.5 m
Breaking load	2T
Type	cargo net

Marking and traceability

SKU	001124
IMPA	232151

Handling, service life and disposal

Store in a dry, clean place away from abrasion, excessive heat and prolonged sunlight. Inspect before each use for wear, cuts and deformation in the ropes and mesh. Replace the net if any structural damage is found and dispose of it according to applicable environmental practices for plastic materials.
