

Cargo Net 3TO Chutuo

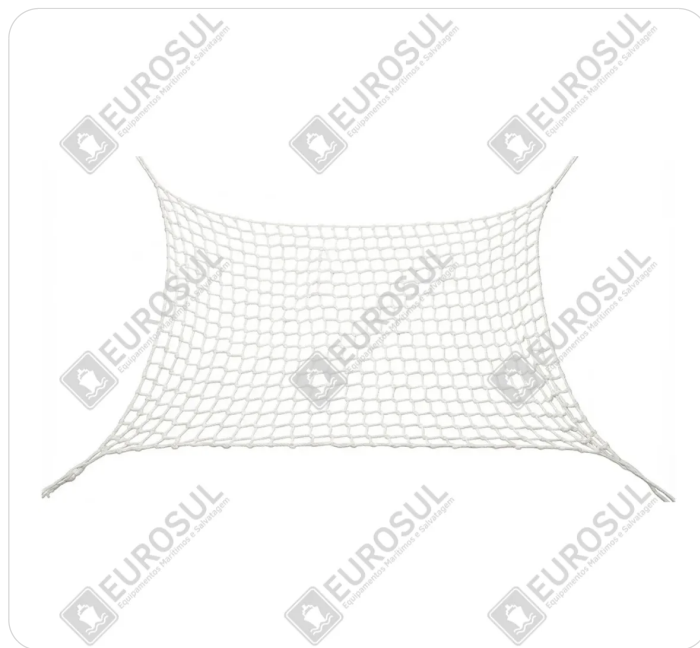

The 3x3m multifilament polypropylene cargo net is a practical solution for handling and lifting loads on board. Lightweight, durable and easy to use, it helps keep operations safer and more efficient.

COD EUROSUL: 001125

IMPA: 232152

Part Number: 20203-1221

Approvals: ---

Specifications

Overview

Multifilament polypropylene cargo net with 3-strand construction and 3.0 x 3.0 m dimensions. It is designed to support onboard load handling and lifting, with a focus on practicality and operational organization.

Application and use

Used in onboard operations to secure, move and lift loads with a crane or compatible lifting equipment. The 3-strand configuration helps distribute the load in routine applications.

Construction characteristics

Material	Multifilament polypropylene
Rope construction	3-strand
Border rope	16 mm
Mesh rope	20 mm

Technical specifications

Type	Cargo net
------	-----------

Length	3 m
Width	3 m
Breaking load	3TO
Part number	20203-1221
IMPA	232152

Marking and traceability

SKU	001125
Part number	20203-1221
IMPA	232152

For best service life, keep the net clean, dry and stored away from excessive heat, oil and aggressive chemicals. Inspect for wear, cuts and deformation before each use; remove from service any item with visible damage or doubtful integrity.
