

Release Hook for Rescue Boat/Raft – PX-01 (35kN)

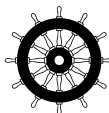

The PX-01 Release Hook is designed for safe and efficient hoisting and launching of inflatable rafts and rescue boats, in compliance with stringent SOLAS, MSC.81(70), and LSA Code standards. Ideal for large vessels, it supports davit loads up to 3,500 kg, ensuring reliable performance in both automatic and manual modes.

COD EUROSUL: 090171

IMPA: ---

Part Number: PX-01

Approvals:

SOLAS

Specifications

Features

Capacity: 35 kN.

Standards: SOLAS, MSC.81(70), LSA Code.

Operation: automatic/manual system with safety lock for controlled release on water contact.

Benefits

Safety: prevents accidents during launch.

Reliability: stable performance under all marine conditions.

Ease of use: fast and intuitive operation in emergencies.

Applications

Ideal for liferafts and rescue boats with davit systems on ships and offshore platforms.

Technical Specifications

Material: corrosion-resistant stainless steel.

Capacity: 35 kN.

Weight: 7 kg.

Dimensions: 285x260x70 mm

Certification: SOLAS, MSC.81(70), LSA Code.
